RE: (DST Out Put: Job # 206033)  
Structural Steel Work

Dear Chip,

I would like to take this opportunity to express my appreciation for the hard work and dedication that I witnessed from the entire United Steel team concerning the DST Output project in South Windsor CT.

As you are aware, this project was divided into (2) phases. Phase (1) was the 45,000 SF Main building expansion/addition and phase (2), which just completed, was the 1,625 SF Loading Dock addition. Throughout the construction process your team continue to meet and surpass critical path milestones, while never jeopardizing the quality of work, which allowed the entire project team to complete both phases on time.

Since the beginning of the project your team has demonstrated a thorough knowledge of the scope of work to be performed and applied the coordination measures necessary to ensure that our project proceed smoothly. I am particularly impressed with the efforts of Mr. Daniel Kasica (Project Manager), Mr. Kevin Vonderkall (Field Superintendent) and Mr. Ronald Beverage (Field Forman). They consistently acted with our best interest in mind.

In closing, I must compliment your company on the professional attitude of the United Steel team involved. I would not hesitate to recommend this team for another project with Suffolk Construction.

I look forward to continuing our working relationship in the future.

Sincerely,  
Suffolk Construction Company

  
Brian J McSweeney  
Superintendent
